Lab 01:

1. Các thành phần chính trong hình

2. Luồng hoạt động

3. Ý nghĩa của ORM trong hình

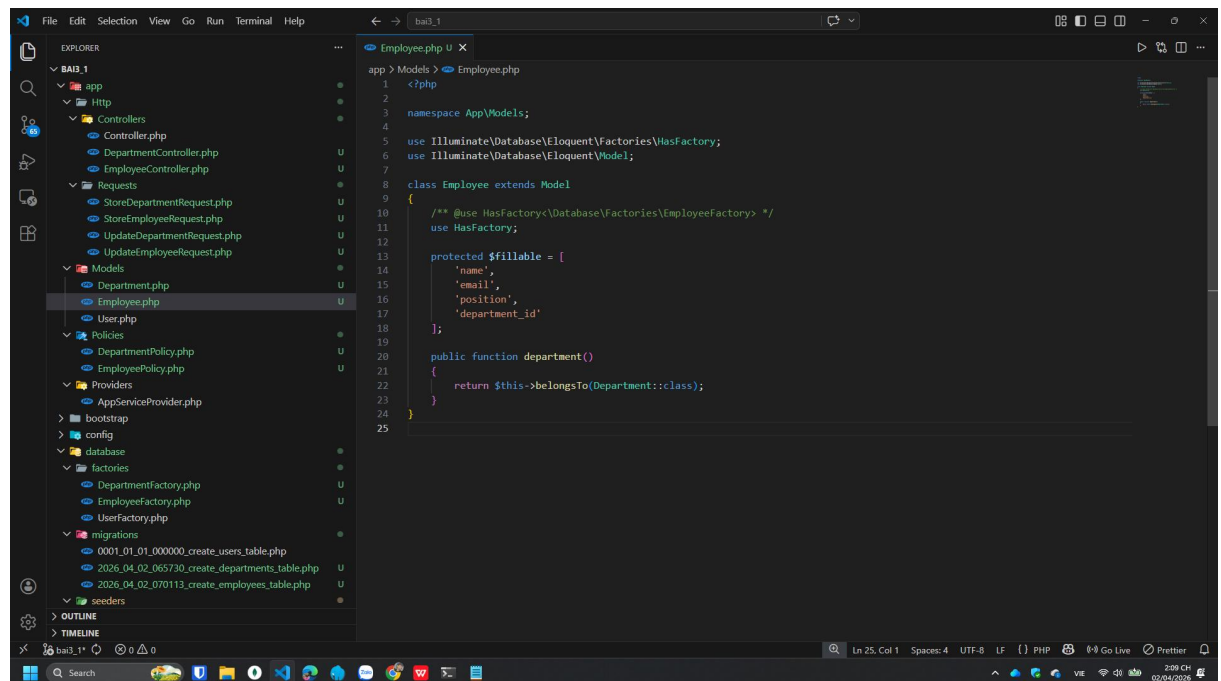

Bài 01:

Chạy lệnh: `php artisan make:model Employee -a`

```
PS D:\workspace\laravel\bai3_1> php artisan make:model Employee -a

INFO Model [D:\workspace\laravel\bai3_1\app\Models\Employee.php] created successfully.
INFO Factory [D:\workspace\laravel\bai3_1\database\factories\EmployeeFactory.php] created successfully.
INFO Migration [D:\workspace\laravel\bai3_1\database\migrations\2026_04_02_070113_create_employees_table.php] created successfully.
INFO Seeder [D:\workspace\laravel\bai3_1\database\seeders\EmployeeSeeder.php] created successfully.
INFO Request [D:\workspace\laravel\bai3_1\app\Http\Requests\StoreEmployeeRequest.php] created successfully.
INFO Request [D:\workspace\laravel\bai3_1\app\Http\Requests\UpdateEmployeeRequest.php] created successfully.
INFO Controller [D:\workspace\laravel\bai3_1\app\Http\Controllers\EmployeeController.php] created successfully.
INFO Policy [D:\workspace\laravel\bai3_1\app\Policies\EmployeePolicy.php] created successfully.
```

Sửa file: `app/Models/Employee.php`

```
Employee.php
1 <?php
2
3 namespace App\Models;
4
5 use Illuminate\Database\Eloquent\Factories\HasFactory;
6 use Illuminate\Database\Eloquent\Model;
7
8 class Employee extends Model
9 {
10     /** @use HasFactory<Database\Factories\EmployeeFactory> */
11     use HasFactory;
12
13     protected $fillable = [
14         'name',
15         'email',
16         'position',
17         'department_id'
18     ];
19
20     public function department()
21     {
22         return $this->belongsTo(Department::class);
23     }
24 }
25
```

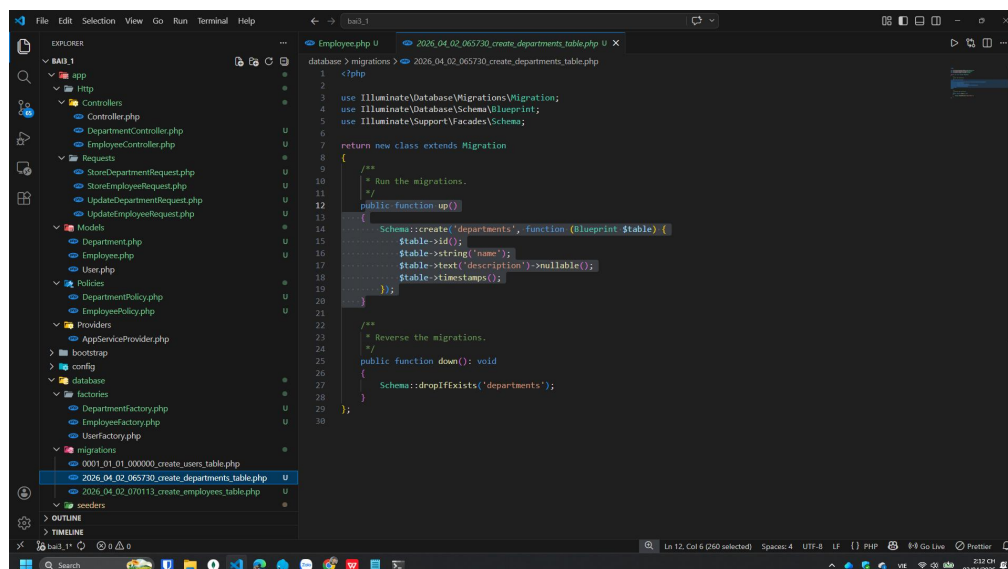

Bài 02:

Chạy lệnh: `php artisan make:model Department -a`

```
PS D:\workspace\laravel\bai3_1> php artisan make:model Department -a

INFO Model [D:\workspace\laravel\bai3_1\app\Models\Department.php] created successfully.
INFO Factory [D:\workspace\laravel\bai3_1\database\factories\DepartmentFactory.php] created successfully.
INFO Migration [D:\workspace\laravel\bai3_1\database\migrations\2026_04_02_065730_create_departments_table.php] created successfully.

```

Bài 03:

Sửa file: `app/Http/Controllers/EmployeeController.php`

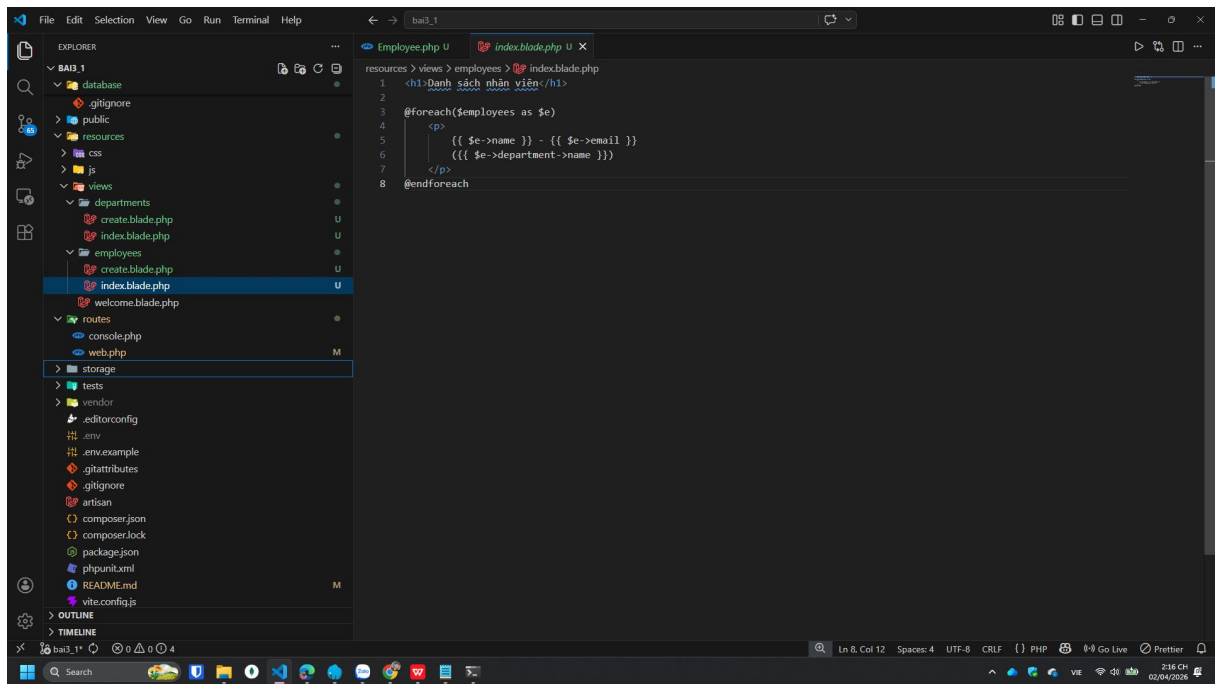

Bài 04:

Tạo file resources/views/employees/index.blade.php

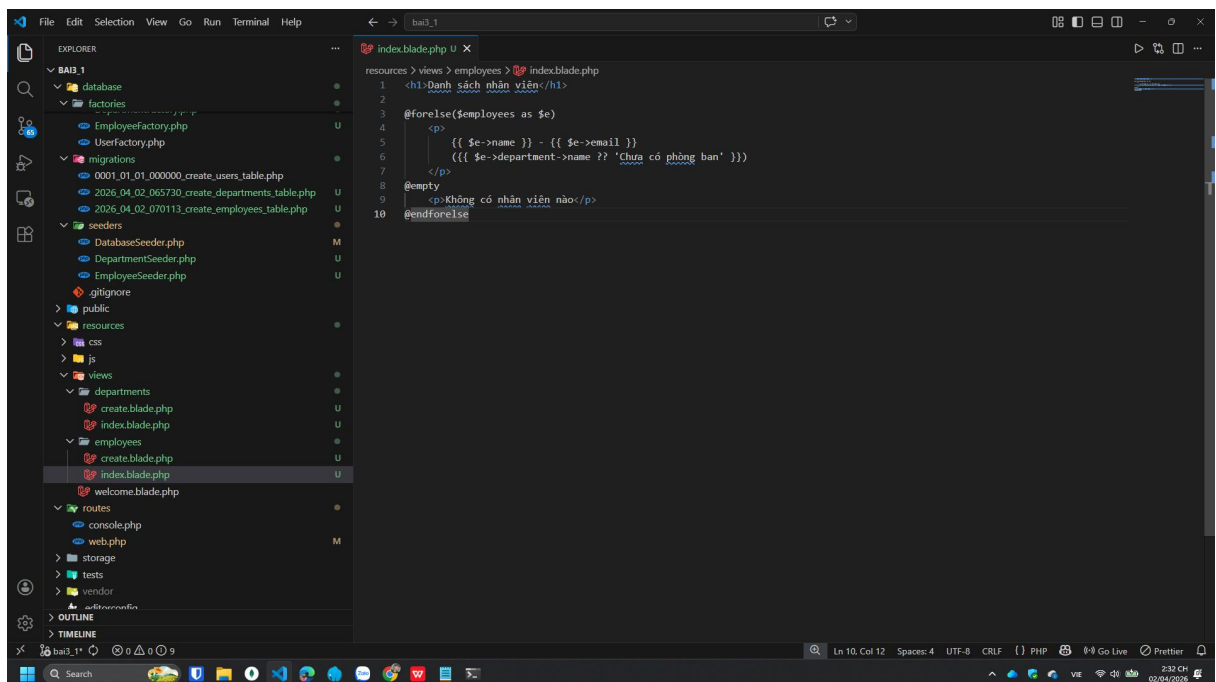

Bài 05:

Sửa file resources/views/employees/index.blade.php

Bài 06:

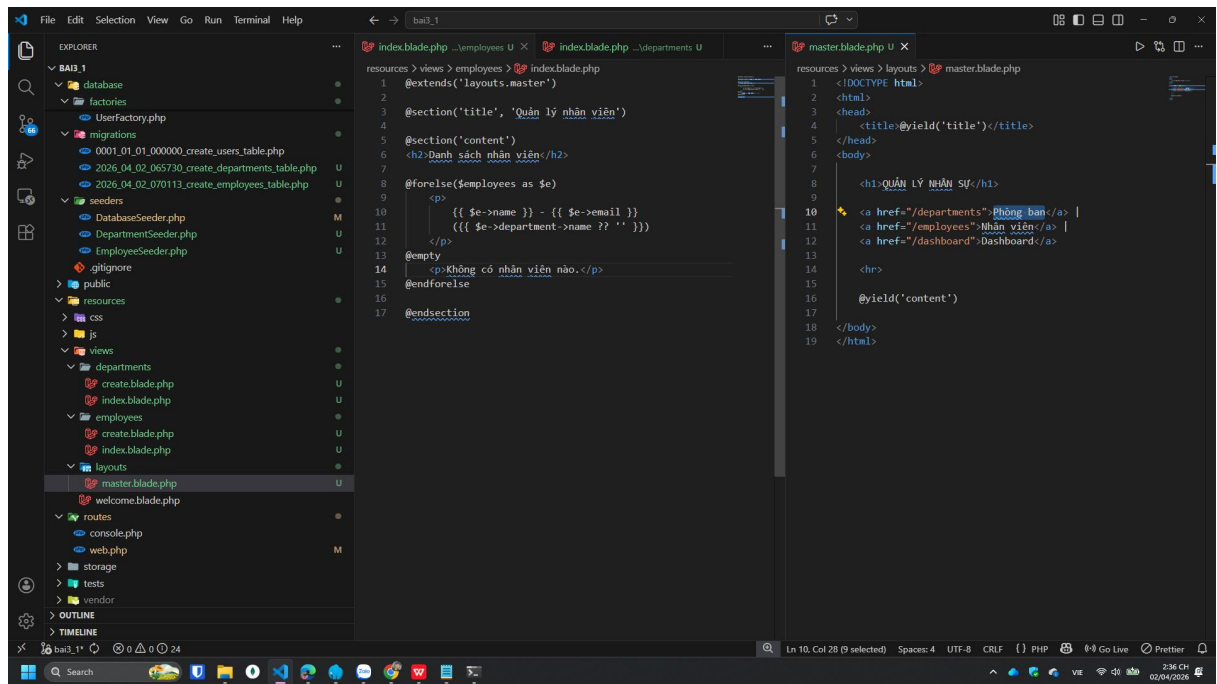

Sửa file resources/views/employees/index.blade.php

Bài 07:

Tạo file resources/views/layouts/master.blade.php

Và sửa file resources/views/employees/index.blade.php

Bài 08:

Chạy lệnh: `php artisan make:component Alert`

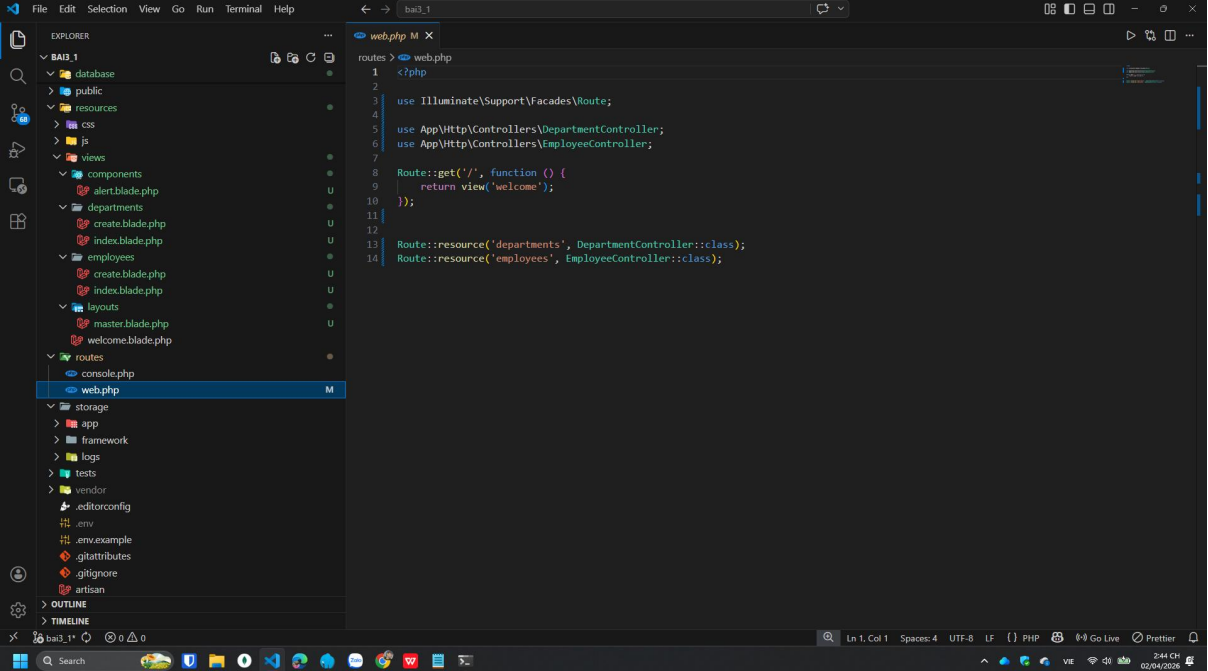

```
PS D:\workspace\laravel\bai3_1> php artisan make:component Alert

INFO Component [D:\workspace\laravel\bai3_1\app\View\Components\Alert.php] created successfully.

INFO View [D:\workspace\laravel\bai3_1\resources\views\components\alert.blade.php] created successfully.
```

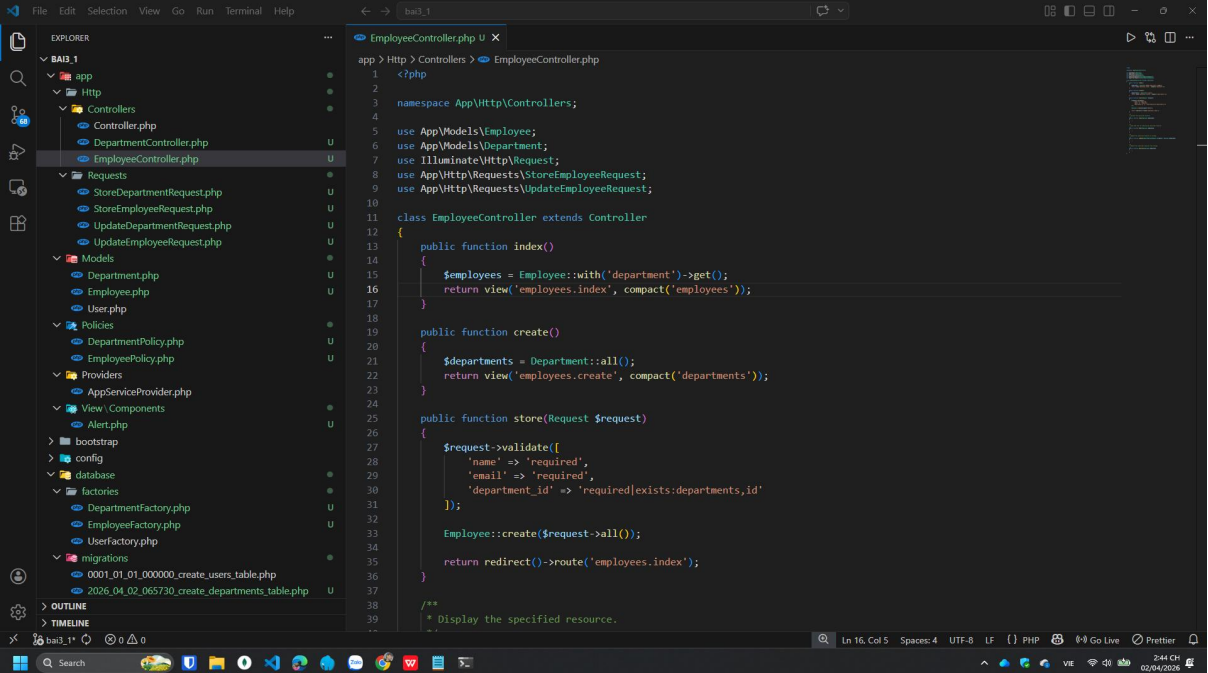

Bài 09:

Sửa route: routes/web.php

```
1 <?php
2
3 use Illuminate\Support\Facades\Route;
4
5 use App\Http\Controllers\DepartmentController;
6 use App\Http\Controllers\EmployeeController;
7
8 Route::get('/', function () {
9     return view('welcome');
10 });
11
12
13 Route::resource('departments', DepartmentController::class);
14 Route::resource('employees', EmployeeController::class);
```

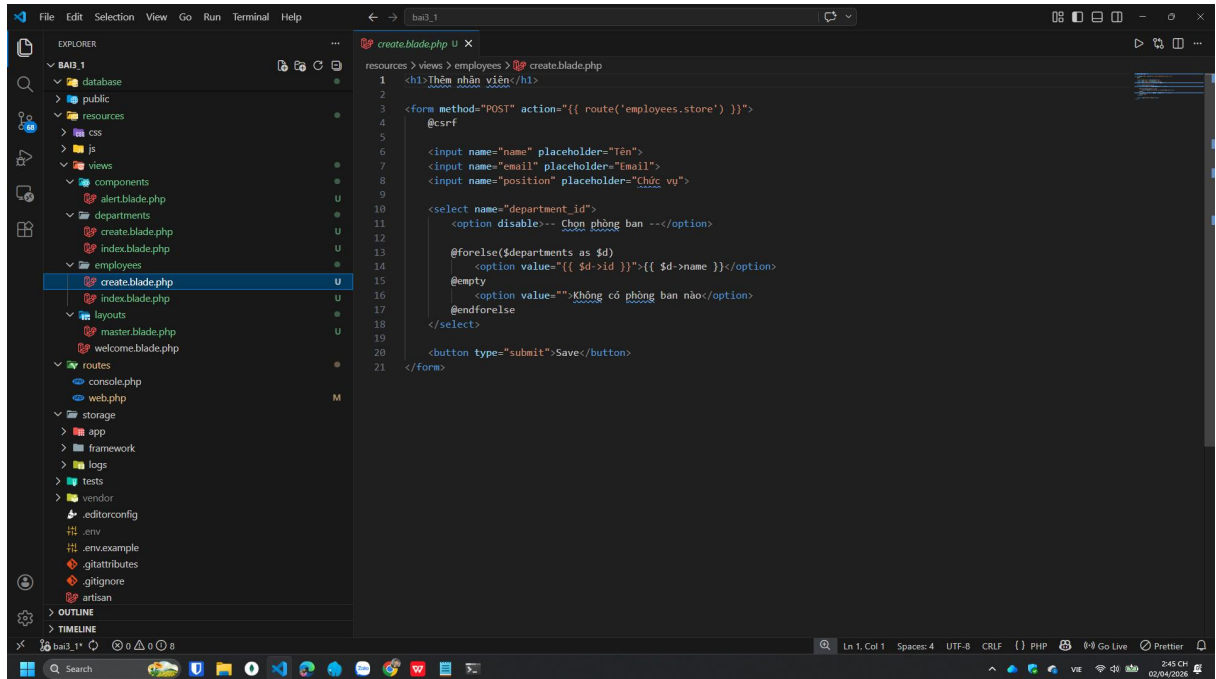

Sửa file: app/Http/Controllers/EmployeeController.php

```
1 <?php
2
3 namespace App\Http\Controllers;
4
5 use App\Models\Employee;
6 use App\Models\Department;
7 use Illuminate\Http\Request;
8 use App\Http\Requests\StoreEmployeeRequest;
9 use App\Http\Requests\UpdateEmployeeRequest;
10
11 class EmployeeController extends Controller
12 {
13     public function index()
14     {
15         $employees = Employee::with('department')->get();
16         return view('employees.index', compact('employees'));
17     }
18
19     public function create()
20     {
21         $departments = Department::all();
22         return view('employees.create', compact('departments'));
23     }
24
25     public function store(Request $request)
26     {
27         $request->validate([
28             'name' => 'required',
29             'email' => 'required',
30             'department_id' => 'required|exists:departments,id'
31         ]);
32
33         Employee::create($request->all());
34
35         return redirect()->route('employees.index');
36     }
37
38     /**
39      * Display the specified resource.
```

Bài 10:

Tạo file resources/views/employees/create.blade.php

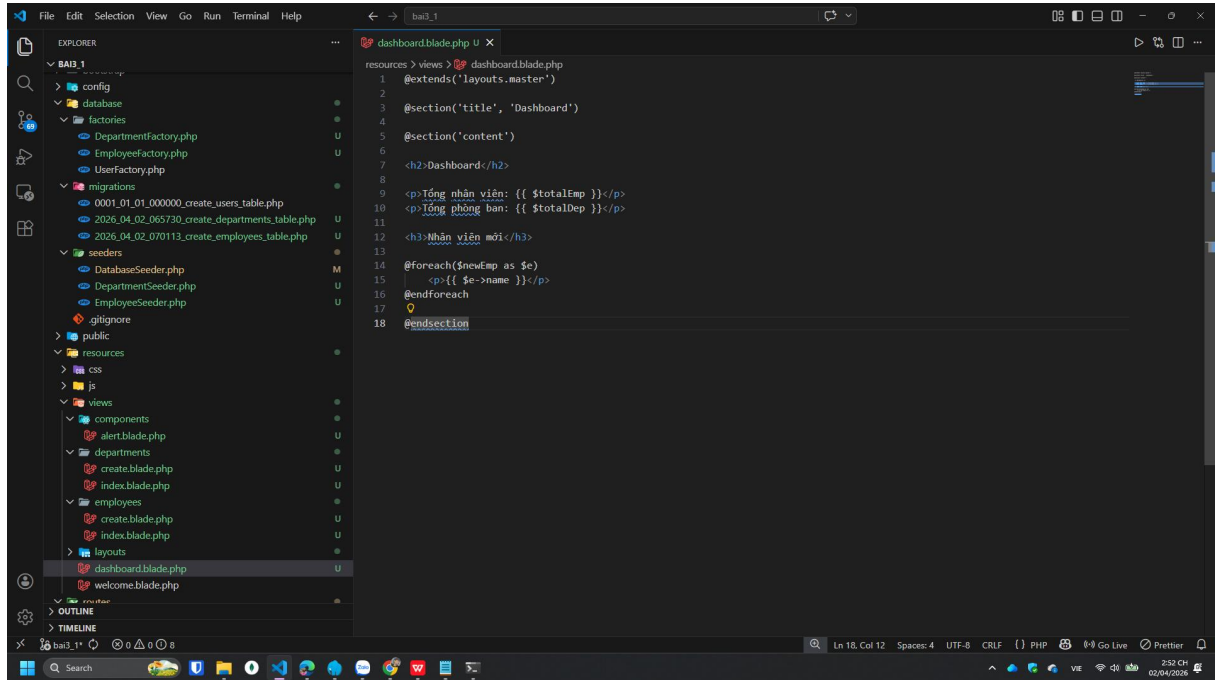

The screenshot shows a code editor with a file explorer on the left and a code editor on the right. The file explorer shows a project structure with folders like database, public, resources, views, and components. The file resources/views/employees/create.blade.php is selected. The code editor shows the following code:

```
1 <h1>Thêm nhân viên</h1>
2
3 <form method="POST" action="{{ route('employees.store') }}">
4     @csrf
5
6     <input name="name" placeholder="Tên">
7     <input name="email" placeholder="Email">
8     <input name="position" placeholder="Chức vụ">
9
10    <select name="department_id">
11        <option disabled-- Chon phòng ban --></option>
12
13        @foreach($departments as $d)
14            <option value="{{ $d->id }}">{{ $d->name }}</option>
15        @empty
16            <option value="">Không có phòng ban nào</option>
17        @endforeach
18    </select>
19
20    <button type="submit">Save</button>
21 </form>
```

The code is a Blade template for creating a new employee. It includes a title "Thêm nhân viên", a form with a CSRF token, and input fields for name, email, position, and department_id. The department_id field is a select box with a disabled option "Chon phòng ban" and a loop of options for each department. A "Save" button is at the bottom.

Bài 12:

Tạo file resources/views/employees/dashboard.blade.php

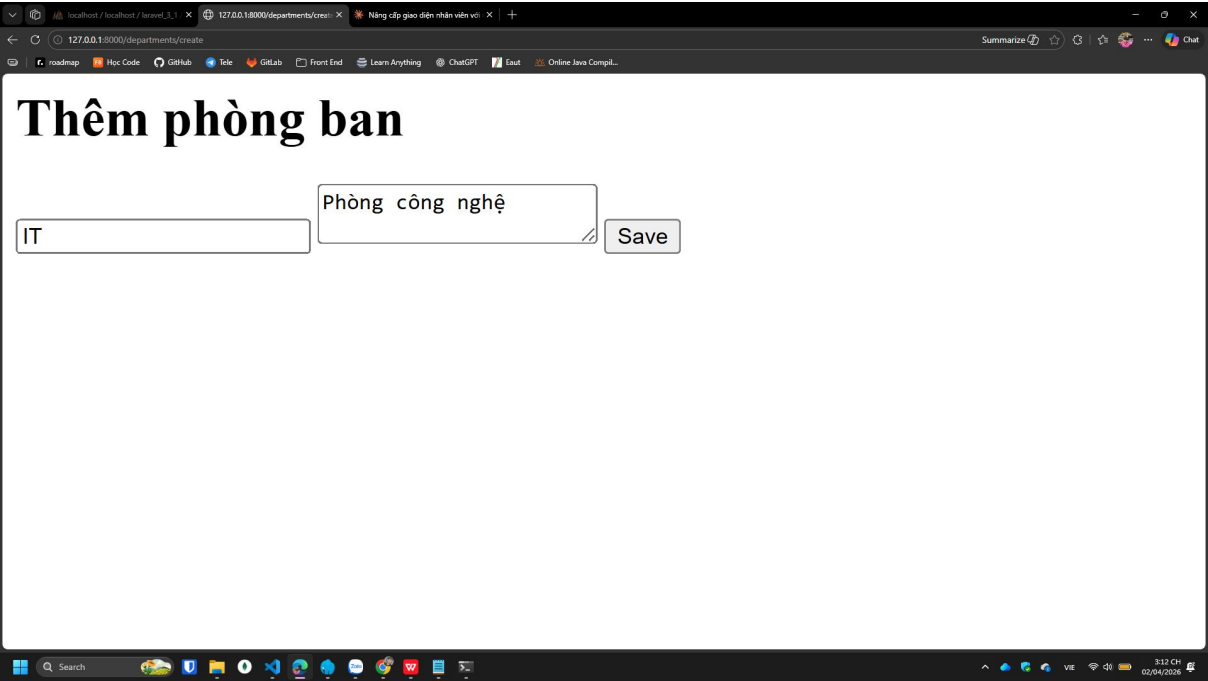

The screenshot shows the Visual Studio Code interface with a project named 'bai3_1'. The Explorer sidebar on the left displays the file structure, including folders like 'config', 'database', 'factories', 'migrations', 'seeds', 'public', 'resources', 'views', and 'employees'. The 'employees' folder is expanded, showing files like 'create.blade.php', 'index.blade.php', and 'welcome.blade.php'. A new file, 'dashboard.blade.php', is being created in the 'employees' folder. The main editor area shows the content of this new file, which extends the 'layouts.master' layout and contains a section for the dashboard. The code includes a title section, a content section, and a loop to display employee data.

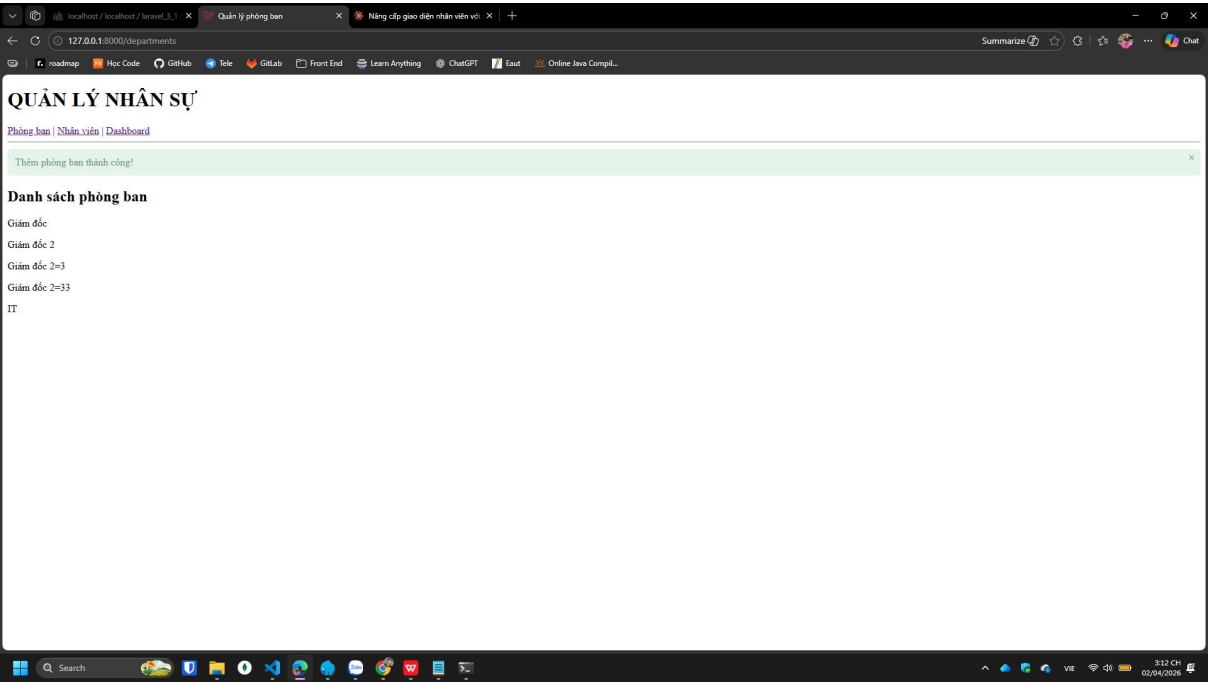

```
1 @extends('layouts.master')
2
3 @section('title', 'Dashboard')
4
5 @section('content')
6
7 <h2>Dashboard</h2>
8
9 <p>Tổng nhân viên: {{ $totalEmp }}</p>
10 <p>Tổng phòng ban: {{ $totalDep }}</p>
11
12 <h3>Nhân viên mới</h3>
13
14 @foreach($newEmp as $e)
15     <p>{{ $e->name }}</p>
16 @endforeach
17
18 @endsection
```
